COMMITTED TO SUPERIOR **CANCER CARE**

Each day we're committed to beating cancer and saving lives. Our highly skilled and experienced specialists treat a wide range of cancers. We work together to deliver the best outcomes for our members – at every step of their journey.

Saving lives through early detection

When it comes to cancer, early detection can save lives. Our integrated approach aligns all our members' caregivers and physicians through our unique technology, which allows us to take a preventative approach in caring for our members. Our comprehensive, convenient, and effective programs to screen our members, allow us to better prevent or detect and treat cancers early and save lives.

Ranked No. 1 in the most quality measures

We ranked No. 1 in 27 of 42 HEDIS (Healthcare Effectiveness Data Information Set) Prevention and Treatment measures for breast and cervical cancer screening.⁴

Cancer by the numbers

1.7 million new cancer cases in U.S. in 2018¹
 1:2 chance of developing cancer in men²
 1:3 chance of developing cancer in women²
 6,280 new cancer cases in Hawaii in 2018¹

Our approach to Cancer Care

At Kaiser Permanente, no member – or doctor – goes it alone. Our multidisciplinary approach means an entire team of specialists is involved in reviewing, assessing, and developing treatment options based on each case. The team evaluates any possible avenue for treatment with advanced procedures and technology.

When a cancer diagnosis is made, a team of experts is automatically formed to support that member. Specialists review test results and make treatment plans that help speed up treatment and improve outcomes.

In addition, we have other resources including classes, support groups and programs for our members and their family, mental health services and other care options to provide them with the help and resources they need.

Some of the brightest minds in medicine

Our highly skilled and experienced doctors treat a wide range of cancers using the latest protocols, technologies, and techniques. They also work in true partnerships with their patients. Built on care, communication, and collaboration, these partnerships are vital in determining the best course of treatment for every individual.

Kaiser Permanente is accredited/certified with the following organizations

Kaiser Permanente’s oncology department has achieved certification in the Quality Oncology Practice Initiative (QOPI®) program, a quality care assessment established by the American Society of Clinical Oncology (ASCO). The QOPI Certification Program (QCP™) provides certification for outpatient hematology-oncology practices that meet nationally recognized standards for quality cancer care.

Moanalua Medical Center has been recognized for excellence in cancer care.³
