DEDICATED TO SUPERIOR **CARE FOR WOMEN**

From reproductive health and pregnancy to osteoporosis and heart disease, the health care needs of women differ from men. Our physicians work in collaboration to care for women across generations.

Support from a team of top-notch physicians

At Kaiser Permanente, our members have various choices for their health care needs. In addition to primary care physicians, members can self-refer to obstetrics/gynecology specialists (Ob-Gyn), physician assistants, nurse practitioners, and certified nurse midwives.

The common thread among these providers is advanced training in the care of women; a commitment to proven, evidence-based treatment; and a network of specialists and colleagues to support their work.

An innovative approach to caring for women

Our patients' physicians and providers are all connected by a sophisticated electronic medical record system, which allows members to stay on track with preventive screenings and access different specialties if needed. Patients are at the center of our integrated care delivery, and our focus remains to provide high quality care.

Our services

We provide a wide variety of services for women to support their overall health, wellness, and beauty, including:

- Aesthetic procedures* (cosmetic dermatology, cosmetic plastic surgery)
- Bone health
- Breast health
- Gynecology
